The Disease of Obesity: Pathophysiology and Management

Course Type: On-Demand Webcourse

Number of Credits: 1

Credit Type: CME/AANP/AAPA

START COURSE NOW

This activity will review the most up-to-date understanding of asthma phenotypes and endotypes, as well as agents recently made available to manage asthma, and those in late-stage development, and examine strategies for improving patient adherence to asthma medications.

Some topics covered:

- Classification of patients with asthma based on disease presentation, severity, and endotype
- PCP?driven strategies to promote asthma medication adherence and proper inhaler use
- The most recent safety and efficacy data for the newer asthma armamentarium
- Newer asthma therapies in appropriate care plans
